Call for Papers - AMSTA 2025

AMSTA 2025: 19th International Conference on Agent & Multi-Agent Systems: Technologies & Applications

25-27 June, 2025 | Solin, Croatia

<http://amsta-25.kesinternational.org/>

Part of KES Smart Digital Futures conference which groups AMSTA-25, IDT-25, HCIS-25, InMed-25, SEEL-25 and STS-25 in one venue.

<http://sdf-25.kesinternational.org/>

Aim

KES-AMSTA is an international scientific conference for research in the field of agent and multi-agent systems. Agents and multi-agent systems are related to a modern software paradigm which has

Important Dates

JUN
25

CONFERENCE
DATE
**June 25-27,
2025**

long been recognized as a promising technology for constructing autonomous, complex and intelligent systems.

Consisting of keynote talks by experts in the field, oral and poster presentations, KES-AMSTA-25 will provide an excellent opportunity for researchers to discuss modern approaches and techniques for agent and multi-agent systems and their applications, as well as intelligent systems in the field of social networks, self-organisation and trust.

Dates, Conference and Publication

- Submission Deadline: 5 February 2025
- Acceptance Notification: 4 March 2025
- Camera Ready Submission: 25 March 2025
- Presentation at Conference: 25-27 June 2025
- Publication: Springer; Series on Smart Innovation, Systems and Technologies

Scope

The AMSTA conference includes a broad range of topics applicable to Agents and Multi-agent Systems. The following topics are indicative of the scope of the conference, however other relevant topics are applicable.

Agent and Multi-agent Systems

Software agent is a program which performs actions defined by user. Multi-agent system consists of autonomous and collaborative agents that have particular degree of mobility and intelligence. It is intended to provide the researchers an opportunity to exchange theoretical and technical knowledge, hands-on experience, as well as to discuss current development and explore trends in agent systems. The call is addressed to scientists and engineers from both academic and industrial environments, who design, develop and implement software agents in different areas and applications.

New Digital and Knowledge Economy

The modern economy is driven by technologies and knowledge. Digital technologies can free, shift and multiply choices, often intruding on the space of other industries, by providing new ways of conducting business operations and creating values for customers and companies. Examples technologies are mobile and cloud computing, big data analysis, business intelligence, artificial intelligence, social systems, computer embedded systems and nature inspired manufacturing, etc. We would therefore love to hear from both the research and industrial communities on their latest work on innovative technologies and applications that is potentially disruptive to industries. Furthermore, technologies need to work well with innovative business models to create wealth and welfare. In an attempt to bring the two communities together, we would therefore love to

hear from business communities on their experiences for adopting technologies when creating new business models.

Industrial Track

The purpose of the Industrial Track is to promote research in our aforementioned topic areas and foster scientific exchange between researchers, practitioners, scientists, students, and engineers in multi-agent systems and disruptive technologies. We particularly recognise the importance of interdisciplinary work to create today's Digital and Knowledge Economy. Standard length scientific papers, overview of research conducted in a company and short visionary paper and poster presentation are therefore most welcome.

Call for Invited Sessions

An invited session consists of a presentation session of 6 to 12 or more papers on a specific conference topic, organised as half or full day mini-conference. We invite senior scientists who have a special interest in a specific conference topic to take responsibility for an invited session, gathering papers from a range of research

expertise around the world.

Researchers who would like to organise one or more Invited Sessions on topics falling within the scope of the conference are invited to submit a proposal for consideration.

[Click Here to Download Invited Session Template](#)

IS01: Education in 21st Century: Artificial Intelligence and future developments

IS02: Business Economics and Agent-based Modeling

IS03: Intelligent Agents in health, wellness, sustainability and human development environments

IS04: Agent-based Modeling and Simulation (ABMS)

For details of the sessions accepted so far see here:

Submission Guidelines and Review Process

Authors are invited to submit original, unpublished papers which are not under review for another conference, workshop, or journal by the time of submission. The contributors should address one or more research areas included above.

Detailed submission information is available on the conference page --here--

Submitted papers will undergo double-blind peer review by at least two members of the program committee. Prior to submission, please ensure that you have removed any information from your paper which could identify the authors. Paper acceptance is based on the following criteria: novelty, technical soundness, practical or theoretical impact, clarity, and presentation. At least one author per paper submission is required to register for the conference, and to present the paper.

Organisation

Honorary Chairs:

I. Lovrek, University of Zagreb, Croatia

L. C. Jain, Liverpool Hope University, UK

General Co-Chairs:

G. Jezic, University of Zagreb, Croatia

J. Chen-Burger, Heriot-Watt University, Scotland,
UK

Executive Chair: R. J. Howlett, Visiting Professor,
'Aurel Vlaicu' University of Arad, Romania and
Visiting Professor, Cardiff Metropolitan University,
Wales,UK

International Programme Committee

The list of the IPC members will be added shortly
to the conference page -- here --

Our Destination

SDF-25 will be held at the Hotel President Solin,
Croatia

For more details of the venue please click --here--

We hope you will join us at this stunning
destination....

Stay in Touch

Don't forget to follow us on Twitter and on LinkedIn you can follow our company page and join our Group: KES International Knowledge Connections to keep up-to-date with news, events and discussions.
