In MDAI we are particularly interested in the different facets of decision processes in a broad sense. This includes model building and all kind of mathematical tools for data aggregation, information fusion, and decision making; tools to help decision in **data science** problems (including e.g., statistical and **machine learning**

**Algorithms** as well as data

visualization tools); and algorithms for data privacy and transparency-aware methods so that data processing processes and decisions made from them are fair, transparent, explainable and avoid unnecessary disclosure of sensitive information.

The MDAI conference includes tracks on the topics of

(i) **Data Science** and **Machine Learning**,

CONFERENCE  
DATE  
**September  
7-9, 2026**

(ii) data privacy,  
(iii) aggregation functions,  
(iv) human decision making,  
(v) graphs and (social) networks, and  
(vi) **security** information security.

The conference has been since 2004 a forum for researchers to discuss last results into these areas of research.

Papers should not exceed 12 pages in total, using LNCS/LNAI 2-column style. Proceedings with accepted papers will be published in the LNAI/LNCS series (Springer-Verlag) and distributed at the conference, as done in previous MDAI conferences

MDAI 2025 is the 23rd MDAI conference. Previous conferences were celebrated in Barcelona (2004), Tsukuba (2005), Tarragona (2006), Kitakyushu (2007), Sabadell (2008), Awaji Island (2009), Perpinyà (2010), Changsha (2011), Girona (2012), Barcelona (2013), Tokyo (2014), Skövde (2015), Sant Julià de Lòria (2016), Kitakyushu (2017), Mallorca (2018), Milan (2019), cancelled due to COVID (2020), Umeå (2021), Sant Cugat (2022), Umeå (2023), Tokyo (2024), València (2025).

MDAI is rated as a CORE B conference by the Computing Research and **education** Association of Australasia (CORE):
