| About the Conference

The MFCS conference series on Mathematical Foundations of Computer Science is a high-quality venue for original research in all branches of Theoretical Computer Science.

MFCS is among the conferences with the longest history in the field — the first conference in the series was held already in 1972. Traditionally, the conference moved between the Czech Republic, Poland, and Slovakia; while since 2013, the conference has traveled around Europe.

In 2025, at its round 50th edition, MFCS will be held as a physical event in Warsaw, Poland.

Submission Guidelines

As in previous years, MFCS 2025 proceedings will be published in LIPIcs (Leibniz International Proceedings in Informatics) under an open access license.
