The IEEE International Requirements Engineering Conference is the premier requirements engineering (RE) conference, where researchers, practitioners, students and educators meet, present and discuss the most recent innovations, trends, experiences and issues in the field of RE.

RE'25 welcomes original contributions focusing on traditional RE topics, such as requirements elicitation, analysis, prioritisation, documentation, validation, evolution, and maintenance. It also highly encourages contributions covering novel areas at the boundary of RE and other disciplines, including but not limited to software engineering/computer science at large, mechanical/electronic/civil and other engineering, business, social science, psychology,

anthropology, and the humanities.

In addition, this year, we particularly encourage submissions addressing the theme “Future-proofing Requirements Engineering”. This theme focuses on innovating RE by embracing AI, DevOps, sustainability, security, personalization, and agile practices. It aims to equip professionals with the tools and methodologies needed to address the evolving challenges and opportunities in software development, ensuring robust, user-centric, and adaptable systems.
